

Suitable for virtually any architectural requirements including public spaces and home use

Ideal for indoor or outdoor applications from basic installations to large-scale, complex projects

Finish options including frameless glass for the ultimate in luxury for upscale commercial applications

Savaria™ V-1504 Vertical Platform Lift

VERSATILITY FOR ANY APPLICATION

The Savaria V-1504 vertical platform lift is built to carry a wheelchair and passenger safely up and down one or more levels.

Suitable for installations in public and commercial buildings, as well as private homes, this Savaria lift features an extremely versatile design that can be configured and customized to suit virtually any project requirements and aesthetic needs. From the rugged outdoors, to the most luxurious office tower lobbies, the Savaria V-1504 lift is ready to serve with its reliable performance, ease of use and range of finish options.

SAVARIA™ V-1504 VERTICAL PLATFORM LIFT

The Savaria V-1504 vertical platform lift is available in a range of base models, all with options and configurations available for customization to your needs. Please consult your local skilled Savaria dealer for complete details and local requirements for installation compliance.

STANDARD (V-1504 STD)

Ideal for basic commercial applications and home use. This lift can be used indoors and outdoors to travel a standard 48" with 2 stops or optionally more distance and stops. The standard unit can be custom enclosed on site by your local installer. Popular for use in schools, places of worship and other public spaces, the standard model can be outfitted with a range of options to suit the installation need.

ALUMINUM/ACRYLIC MODEL (V-1504 ALPE)

This enclosed model uses aluminum and acrylic inserts and top dome with corrosion-resistant steel components, making it ideal for outdoor applications. Optionally, this model can be ordered with tempered glass panels. The active ventilation system keeps the inside comfortable and the gates and door can be motorized.

Every Savaria V-1504 model is driven by our reliable hydraulic system and can be configured just for your needs. The lift travels up and down a rail system enclosed in the lift tower. The tower is supported with attachment to an existing wall or through a constructed hoistway. Because the drive system is contained within the lift tower, no additional machine room is required for installation.

SMOOTH HYDRAULIC 2:1 CHAIN DRIVE SYSTEM

The lift provides a high efficiency, reliable and comfortable ride.

LARGE PLATFORM FOR EASY ACCESS

The standard platform is 36" by 54" (ADA compliant), and custom platforms are also available. The non-skid surface provides added safety.

LUXURY FRAMED (V-1504 LUX)

Framed in 304 stainless steel finish No. 4, with tempered glass inserts, this lift is a beautiful complement for lobby areas, offices and public buildings.

PRESTIGE FRAMELESS (V-1504 PRESTIGE)

With half-inch structural tempered glass and no visible frame, this lift is the ultimate statement for creating barrier-free access in commercial applications.

MOBILE

The Savaria V-1504 mobile lift services up to 48" and can be wheeled to the required location as needed. It is fully battery powered (or optional 110V) with an optional outdoor package.

FLEXIBLE DESIGN

Configure up to 23' of travel distance* with up to four stops, with a full range of entrance and exit configurations available.

EXTENSIVE FINISH OPTIONS

Choose standard beige powder coat, select from the optional color finishes, or even request your own custom color. Enclose your lift with acrylic or glass panels.

EMERGENCY BATTERY SYSTEMS

A DC battery system lowers the lift in the event of power failure. A manual lowering system is also included. Optionally, a full up and down battery operated lowering system can be added.

EASY OPERATION

Constant pressure on-board controls move the lift up and down for ease of operation. Call stations at each landing come with keyed access and can be

ordered in a range of styles including wall-mounted, recessed or free-standing.

MACHINE ROOMLESS

The Savaria V-1504 does not require a machine room to house the drive component, simplifying the installation process. Alternatively, the drive system can be located in a remote machine room for ultra-quiet operation.
